Horicon School District's Community Survey Deadline Extended

The deadline to complete the community survey regarding the school district's facility needs has been extended to December 17th. A printing error resulted in some residents not initially receiving the surveys. Those who have not yet received a paper survey in their mail should be receive a survey in early December. The deadline was extended to ensure all residents have adequate time to respond to the survey.

The community-wide survey is gathering citizen input on how the District should address the needs of the nearly 100 year old Van Brunt Elementary School. Additionally, residents are being asked to weigh in on their support of projects at Horicon Junior/Senior High School.

School Perceptions, the company hired to conduct the survey and analyze the data, will present survey results at the Board of Education meeting on Monday, December 18th.

For additional information, please contact the District at (920) 485-2898.
